## REPORT OF THE NINTH CENSUS OF CANADA, 1951

**Volume I - Population - General characteristics** - Population totals down to the smallest geographical areas. Classifications for certain areas by such basic characteristics as sex, age, marital status, origin, religious denomination, birthplace, official language, mother tongue, citizenship, immigration, schooling and war service.

**Volume II - Population - Cross-classifications of characteristics** - (a) Age and sex, and (b) origin and sex, cross-classified with other population subjects. Characteristics of the immigrant population; results of the census of the blind and deaf.

**Volume III - Housing and families** - Housing data covering such characteristics as type of dwelling, number of rooms, tenure, rent, household facilities. Data on size and composition of family and characteristics of family heads.

**Volumes IV - Labour force - Occupations and industries** - Industry and occupation characteristics of the labour force as well as characteristics of age, birthplace, class of worker, immigration, marital status, origin, and years of schooling.

**Volume V - Earnings and employment of wage-earners** - Earnings and employment characteristics of wage and salary earners, as well as characteristics of age, hours worked, industry, marital status, occupation, and sex; and some data for persons 14 years of age and over who were without jobs and seeking work or who were not in the labour force.

**Volume VI - Agriculture (Parts I and II)** - Number, area, value, tenure and size of occupied farms; crops, live stock and machinery. Part I relates to the Atlantic Provinces and Quebec; Part II relates to the rest of Canada.

**Volume VII - Distribution - Retail trade** - Retail trade establishments by geographic areas, kinds of business and type of operations, including such data as number of establishments, sales, employment, payrolls, inventories and commodities.

**Volume VIII - Distribution - Wholesale trade - Services** - Wholesale trade establishments and service establishments by geographic areas, kinds of business and type of operations including such data as number of establishments, sales, employment and payrolls, with inventories and commodities shown for the wholesale trade.

**Volume IX - Fisheries** - Number and status of fishermen, type and size of fishing craft, inventory of fishing gear and shore equipment, landings and disposition of fish, revenues and expenditures.

**Volume X - General review** - Review of the results of the 1951 Census relating to Population, Housing and Families, Labour Force, Agriculture, Distribution and Fisheries including historical and analytical tables as well as textual material.

**Volume XI - Administrative report** - Organization and methods of collecting and compiling the returns of the 1951 Census with background information on history, purpose and legislation.

## RAPPORT DU NEUVIÈME RECENSEMENT DU CANADA, 1951

**Volume I - Population - Caractéristiques générales** - Chiffres de la population jusque dans les plus petites régions géographiques. En ce qui concerne certaines régions, la population est classée selon certaines caractéristiques fondamentales telles que le sexe, l'âge, l'état matrimonial, l'origine, la religion, le lieu de naissance, la langue officielle, la langue maternelle, la citoyenneté, l'immigration, la scolarité, et le service de guerre.

**Volume II - Population - Classements recoupés des caractéristiques** - a) Âge et sexe, et b) origine et sexe recoupés par d'autres caractéristiques de la population. Caractéristiques de la population immigrée; résultats du recensement des aveugles et des sourds.

**Volume III - Habitations et familles** - Données sur l'habitation embrassant des caractéristiques telles que le genre de logement, le nombre de pièces, le mode d'occupation, le loyer, les commodités ménagères. Données sur l'importance numérique et la composition de la famille et caractéristiques des chefs de familles.

**Volume IV - Main-d'œuvre - Occupations et industries** - Caractéristiques de la main-d'œuvre quant aux industries et aux occupations ainsi que détails quant à l'âge, le lieu de naissance, la classe de travailleur, l'immigration, l'état matrimonial, l'origine et la scolarité.

**Volumes V - Gain et emploi des salariés** - Caractéristiques des employés à salaire et à traitement quant au gain et à l'emploi, ainsi que caractéristiques quant à l'âge, les heures de travail contributives, l'industrie, l'état matrimonial, l'occupation, et le sexe; certaines données à l'égard des personnes âgées de 14 ans et plus qui étaient sans emploi et en quête de travail ou qui ne faisaient pas partie de la main-d'œuvre.

**Volume VI - Agriculture (Parties I et II)** - Nombres, superficie, valeur, mode d'occupation et grandeur des fermes occupées; récoltes, bétail et machinerie. La Partie I porte sur les provinces de l'Atlantique et le Québec; la Partie II, sur le reste du Canada.

**Volume VII - Distribution - Commerce de détail** - Établissements de commerce de détail selon les régions géographiques, le genre d'entreprise et le mode d'exploitation, y compris des données sur le nombre d'établissements, les ventes, l'emploi, les salaires, les stocks et les dépenses.

**Volume VIII - Distribution - Commerce de gros - Services** - Établissements de commerce de gros et établissements de service selon les régions géographiques, le genre d'entreprise et le mode d'exploitation, y compris des données sur le nombre d'établissements, les ventes, l'emploi et les salaires, et sur les stocks et les dépenses, en ce qui concerne le commerce de gros.

**Volume IX - Pêche** - Nombre et situation des pêcheurs dans l'industrie, genre et dimensions des embarcations de pêche, inventaire des engins de pêche et des installations à terre, débarquement et emploi du poisson, recettes et dépenses.

**Volume X - Revue générale** - Revue des résultats du recensement de 1951 en ce qui concerne la population, l'habitation et les familles, la main-d'œuvre, l'agriculture, la distribution, et la pêche, y compris tableaux chronologiques et analytiques et texte.

**Volume XI - Rapport administratif** - Organisation du recensement de 1951 et méthodes de collecte et de dépouillement des résultats, ainsi que documentation historique et exposé de l'objet du recensement et de la législation qui le régit.

## PREFACE

Volume VI of the Ninth Census of Canada presents the final results of the Census of Agriculture taken as of June 1, 1951.

A brief introduction sets out the definitions of terms or items used in the volume. The tabular material contains pertinent information for a number of earlier censuses; a series of tables showing current data for counties or census divisions; and a number of tables in which data are cross-classified by such factors as size, tenure and type of farm.

The appendices include a copy of the questionnaires used.

The material for this volume was prepared in the Agriculture Section of the Census Division.

HERBERT MARSHALL,  
*Dominion Statistician*

Ottawa, March 31, 1953.

## PRÉFACE

Le volume VI du neuvième recensement du Canada présente les résultats définitifs du recensement de l'agriculture effectué le 1<sup>er</sup> juin 1951.

Les termes et expressions employés dans le volume sont définis dans une courte introduction. La documentation tabulaire contient des détails comparatifs tirés d'un certain nombre de recensements antérieurs; une série de tableaux donnant les chiffres actuels pour les comtés ou les divisions de recensement; et un certain nombre d'autres tableaux où les chiffres sont recoupés par des détails tels que la grandeur, le mode d'occupation ou de possession et le genre de la ferme.

Les appendices comprennent une reproduction du questionnaire employé.

La matière du présent volume a été préparée à la Section de l'Agriculture de la Division du recensement.

HERBERT MARSHALL,  
*Statisticien du Dominion*

Ottawa, 31 mars 1953.

## TABLE OF CONTENTS - Concluded

Irrigation - Concluded  
(Saskatchewan, Alberta and British Columbia)

- Table 70. Farms reporting irrigation, total area irrigated, area and farms reporting crops irrigated, classified by area irrigated, 1950.
- Table 71. Farms reporting irrigation, total area irrigated, area and farms reporting crops irrigated, 1950, classified by size of farm, 1951.
- Table 72. Farms reporting irrigation, total area irrigated, area and farms reporting crops irrigated, classified by source of irrigation water, 1950.

## APPENDICES

- Appendix A. Newfoundland - Agriculture elsewhere than on farms - Live stock, 1951, animal products, disposal of live stock and crops, 1950.
- Appendix B. Yukon Territory - Agriculture on farms, 1931-1951.
- Appendix C. Census schedules.

## TABLE DES MATIÈRES - fin

Irrigation - fin  
(Saskatchewan, Alberta et Colombie-Britannique)

- Tableau 70. Fermes déclarant un système d'irrigation, superficie totale irriguée, superficie et fermes déclarant des cultures irriguées, classées selon la superficie du terrain irrigué, 1950.
- Tableau 71. Fermes déclarant un système d'irrigation, superficie totale irriguée, superficie et fermes déclarant des cultures irriguées, 1950, classées selon la grandeur de la ferme, 1951.
- Tableau 72. Fermes déclarant un système d'irrigation, superficie totale irriguée, superficie et fermes déclarant des cultures irriguées, classées selon la source d'irrigation par eau, 1950.

## APPENDICES

- Appendice A. Terre-Neuve - Agriculture ailleurs que sur les fermes - Bestiaux, 1951, produits animaux, disposition des bestiaux et cultures, 1950.
- Appendice B. Territoire du Yukon - Agriculture sur les fermes, 1931-1951.
- Appendice C. Formules de recensement.

## INTRODUCTION

Agriculture data as reported in the Ninth Census of Canada taken as of June 1, 1951, are published in Volume VI. Part I contains summary data for Canada, and detailed statistics for the provinces of Newfoundland, Prince Edward Island, Nova Scotia, New Brunswick and Quebec, while Part II contains detailed data for Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.

A detailed account of enumeration and tabulation procedures will be found in the Administrative Report, Volume XI.

**Year to which Census Figures Apply.**—The statistics of farms, farm operators, farm areas, live stock numbers, farm machinery, electric power and indebtedness relate to June 1, 1951, while data on the production of crops, revenues, irrigation, new breaking, disposal of live stock, wool production, and farm expenditures relate to the year 1950. Maple products were reported for the 1951 season. In order to minimize the error due to memory bias, both milk and egg production were reported for May 1951 for all provinces except Newfoundland and the data are included in the division or county tables of this volume. Estimates of milk and egg production were made for the year 1950 and are shown in the historical tables. These estimates were computed by the Agriculture Division of the Dominion Bureau of Statistics and were based on (a) monthly reports received from correspondents; and (b) May 1951 Census data.

**Sampling.**—Data on farm expenditures, milk production, indebtedness and products used on the farm (Questions 167 to 191 inclusive) were asked only at every fifth farm. Estimated totals for all farms are shown in the volume tables.

**Farms.**—In the 1951 Census, a farm was defined as a holding on which agriculture operations are carried out. The holding may consist of a single tract of land or of a number of separate tracts held under different tenures. It must be (a) three acres or more in size or (b) from 1 to 3 acres in size with agricultural production in 1950 valued at \$250 or more. Where the farm was made up of several parts located in different municipalities, the 1951 Census reported the complete farm as one unit in the municipality where the headquarters were located.

Previous censuses counted as farms all holdings one acre or more in size if the production in the previous year was valued at \$50 or more. Unlike the 1951 Census they counted as separate farms, parts of farms lying outside the municipality in which the farm headquarters were located, although the farm area was counted only once.

The effect of this change in the Census definition of a farm is discussed in Volume X.

**Non-resident Farms.**—Where the operator did not live on the farm, the farm was classified as non-resident.

**Fully Owned Farms.**—Full ownership means that the operator holds the title or deed to all the land he operates or has a purchase agreement for same. It does not necessarily mean that the property is free of debt.

**Partly Owned, Partly Rented.**—This term refers to instances where the farm operator owns only part of the land he operates and rents or leases the remainder.

## INTRODUCTION

Les données sur l'agriculture recueillies lors du neuvième recensement du Canada, effectué à compter du 1<sup>er</sup> juin 1951, sont publiées dans le volume VI. La première partie du volume contient des données récapitulatives pour le Canada et des données détaillées pour les provinces de Terre-Neuve, d'Ile-du-Prince-Édouard, de Nouvelle-Écosse, de Nouveau-Brunswick et de Québec, tandis que la deuxième contient des données analogues pour l'Ontario, le Manitoba, la Saskatchewan, l'Alberta et la Colombie-Britannique.

On trouvera dans le Rapport administratif, volume XI, un exposé détaillé des méthodes de dénombrement et de calcul.

**Année à laquelle s'appliquent les chiffres du recensement.**—La statistique des fermes, des exploitants agricoles, des superficies, du nombre de bestiaux, de la machinerie agricole, de l'énergie électrique et de la dette agricole porte sur le 1<sup>er</sup> juin 1951, tandis que celle du rendement des récoltes, des revenus, de l'irrigation, des terres nouvelles mises en culture, de la disposition des bestiaux, de la production de laine et des dépenses de la ferme porte sur l'année 1950. Les produits de l'érable sont ceux de la saison de 1951. Afin de réduire à sa plus simple expression l'erreur qui pourrait résulter d'un défaut de mémoire, la production de lait et d'œufs a été déclarée pour le mois de mai 1951 dans toutes les provinces exceptées Terre-Neuve et les chiffres sont incorporés aux tableaux des divisions ou des comtés dans le présent volume. La production estimative de lait et d'œufs a été calculée pour 1950 et elle est indiquée aux tableaux chronologiques. Ces estimations ont été établies par la Division de l'Agriculture du Bureau fédéral de la statistique et reposent sur a) les rapports mensuels des correspondants; et b) sur les données du recensement relatives au mois de mai 1951.

**Échantillonnage.**—Les questions relatives aux dépenses, à la production de lait, à la dette et aux produits consommés dans les fermes (167 à 191 incluse) ont été posées à toutes les cinquièmes fermes. Les totaux estimatifs pour toutes les fermes sont indiqués dans les tableaux du volume.

**Fermes.**—Pour les besoins du recensement de 1951, une ferme a été définie comme étant une terre sur laquelle se font des travaux agricoles. La terre peut comprendre une seule ou plusieurs parcelles distinctes détenues selon divers modes d'occupation ou de possession. Elle doit être a) de trois acres ou plus ou b) d'une à trois acres et avoir donné en 1950 pour \$250 ou plus de produits agricoles. Lorsqu'une ferme était composée de plusieurs parties situées dans différentes municipalités, la ferme entière était consignée, lors du recensement de 1951, comme une unité dans la municipalité où était située la partie principale.

Lors des recensements antérieurs, toutes les terres d'une acre ou plus étaient comptées comme des fermes si leur production de l'année précédente avait été de \$50 ou plus. Contrairement à la pratique suivie lors du recensement de 1951, bien que la superficie de la ferme n'eût été comptée qu'une fois, les parties de la ferme situées en dehors de la municipalité où se trouvait la partie principale étaient comptées comme des fermes distinctes.

L'effet de ce changement apporté à la définition du recensement est étudié dans le volume X.

**Fermes inhabitées.**—Là où l'exploitant ne demeure pas sur la ferme, celle-ci a été classée ferme inhabitée.

**Fermes "propriété entière".**—Propriété entière signifie que l'exploitant est le détenteur du titre ou acte notarié de toute la terre qu'il exploite ou détient une convention d'achat à l'égard de celle-ci. Cela ne veut pas dire nécessairement que la propriété soit libre de dette.

**Partiellement possédée, partiellement louée.**—Ces expressions s'appliquent aux fermes où l'exploitant n'est propriétaire que d'une partie de la terre qu'il exploite et loue ou prend le reste à bail.

**Farm Operator.**— This term is used in the Census to designate the person who is directly responsible for the agricultural operations of the farm, whether as owner, tenant or hired manager. As one operator only was listed for each farm, the number of farm operators is the same as the number of farms. If, for example, the farm was operated by a partnership, only one partner was considered to be the farm operator.

**Farm Population.**— All persons living in a dwelling situated on a farm as defined in the census were considered to be farm population, regardless of their occupation. In the case of institutions located on a farm, only the manager and his household were included with the farm population. While in previous censuses the farm population as shown in the Agriculture Volume was tabulated from a question appearing on the General Farm Schedule, in the 1951 Census the question appeared only on the population document. Nevertheless the term farm population as used in this volume has the same definition as that of previous censuses. The figures given in tables 15 and 29 include both urban and rural farm population, with the persons living on farms that were located in cities, towns or villages included with those of the adjoining subdivisions.

**Hired Workers.**— This term refers to the number of persons working on the farm for wages during the week ending June 2, 1951. Hired farm managers and family workers receiving regular wages were to be included, but housework was not considered as farm labour.

**Part-time Work.**— The 1951 Census contained two questions relating to work not connected with the operation of the farm:

(1) the relationship of the value of farm products sold to income received by the farm operator from all other sources and

(2) the number of days in 1950 that the operator worked off the farm at either farm or non-farm work.

These two questions were used in the determination of part-time farms in the Economic Classification which is discussed in a later section. In the first question, "other sources" were to include fishing, lumbering, mining, roadwork, carpentry, trucking, etc., but exclude income from bonds or other types of investment. Amounts received from crop insurance, hail insurance, Government subsidies, etc., were to be counted as agricultural products sold. Farm work off the farm such as ploughing, threshing, general farm labour, etc., would only be included if it were for pay or wages. Exchange work was excluded. Tables 66 and 67 give figures on farm operators reporting part-time work classified by number of days worked, age of operator and size of farm.

**Area of Farms.**— Due to the change in the census definition of a farm, the area of occupied farm land in the municipal units in the tabular presentation of census data may be greater or less than the actual farm area located within the municipal boundaries. In some cases the farm area may even exceed the total land area of the municipality. According to the 1951 Census definition of a farm the area of occupied farms reported for each municipality now represents the area of land operated by farmers whose headquarters are in the municipality. For large subdivisions of the provinces such as census divisions or counties the discrepancy between reported area of occupied farms and actual farm area within the subdivision will be less significant.

Large areas of timber land or other non-agricultural land held by a farm operator, but operated apart from the farm business were excluded.

**Exploitant de ferme.**— Ce terme, dans le recensement, désigne la personne directement responsable des travaux agricoles de la ferme, qu'elle en soit le propriétaire, le locataire ou le régisseur engagé. Étant donné qu'un seul exploitant a été attribué à chaque ferme, le nombre d'exploitants est le même que le nombre de fermes. Si, par exemple, la ferme est exploitée en société, un seul des associés est considéré comme étant l'exploitant de la ferme.

**Population agricole.**— Toutes les personnes demeurant dans des logements situés dans des fermes, telles que celles-ci sont définies pour les besoins du recensement, constituent la population agricole, indépendamment de leur occupation. Dans le cas d'institutions situées dans des fermes, seuls le régisseur et son ménage sont comptés comme faisant partie de la population agricole. Lors des recensements antérieurs, la population agricole, telle qu'elle est indiquée dans le volume de l'agriculture, était calculée d'après les réponses faites à une question inscrite au questionnaire agricole général. Au recensement de 1951, cette question ne paraissait que sur le document-population. Toutefois, l'expression "population agricole", telle qu'elle est employée dans le présent volume, a la même définition que lors des recensements antérieurs. Les chiffres des tableaux 15 et 29 contiennent tant la population urbaine que la population rurale agricole, les personnes demeurant dans des fermes situées dans les cités, les villes et les villages étant incluses avec celles des subdivisions voisines.

**Ouvriers engagés.**— Ceux-ci sont les personnes qui avaient travaillé dans une ferme pour un salaire durant la semaine terminée le 2 juin 1951. Les régisseurs agricoles engagés et les travailleurs familiaux recevant un salaire régulier devaient être inclus; le travail ménager, cependant, n'a pas été considéré comme du travail agricole.

**Travail à temps partiel.**— Le recensement de 1951 comportait deux questions relatives au travail étranger à l'exploitation de la ferme:

1° le rapport entre la valeur des produits agricoles vendus et le revenu de toutes autres sources touché par l'exploitant et

2° le nombre de jours en 1950 que l'exploitant a consacré, en dehors de la ferme, à du travail agricole ou non agricole.

Les deux questions ont permis de déterminer le nombre de fermes à temps partiel dans le Classement économique, étudié dans une autre section. Dans la première question, les "autres sources" comprennent la pêche, la coupe du bois, les mines, le travail de charbonnier, la charpenterie, le camionnage, etc., mais ne comprennent pas le revenu découlant d'obligations ou autres formes d'investissement. Les indemnités d'assurance-récolte, d'assurance-grêle, les subventions du gouvernement, etc., devaient compter comme sommes provenant de la vente de produits agricoles. Le travail agricole hors de la ferme tel que le labourage, le battage, le travail général de la ferme, etc., ne devait être inclus que si l'exploitant en avait tiré une rémunération ou un salaire. Le travail étranger n'était pas inclus. Les tableaux 66 et 67 donnent les chiffres à l'égard des exploitants agricoles ayant déclaré du travail à temps partiel, classés selon le nombre de jours de travail, l'âge et la grandeur de la ferme.

**Superficie des fermes.**— En raison du changement apporté à la définition d'une ferme pour les besoins du recensement, la superficie de la terre agricole occupée dans les subdivisions municipales, indiquées dans les tableaux du recensement peut être plus élevée ou moins élevée que la superficie réelle de la terre agricole située dans les limites de la municipalité. Dans certains cas, la superficie agricole peut même surpasser la superficie totale de la municipalité. D'après la définition d'une ferme, lors du recensement de 1951, la superficie des fermes occupées déclarées dans chaque municipalité représente maintenant la superficie de la terre exploitée par les cultivateurs dont la principale partie de la ferme est située dans la municipalité. Dans les grandes subdivisions des provinces telles que les divisions de recensement ou les comtés, la discordance entre la superficie des fermes occupées et la superficie agricole réelle dans la subdivision sera moins prononcée.

Les grandes étendues de terres boisées ou autres terres non agricoles que possède un exploitant, mais qui sont exploitées en marge de l'entreprise agricole ont été exclues.

**Condition of Land.**— All farm land is classified according to use with each acre included in only one of the categories. The classes are as follows:

(a) **Under Crops.**— This includes the total acreage which was, or was to have been, under crops of any kind in 1951, including home gardens. In the case of intercropping or double cropping, the acreage involved was reported only once.

(b) **Improved Pasture.**— All land which has been cultivated and seeded to pasture and was used for grazing is included in this item. Enumerators were instructed not to include natural prairie or hay land that was pastured after the crop had been removed.

(c) **Summer Fallow.**— Enumerators were instructed to include in this item the total acreage which was tilled or was to be tilled as summer fallow in 1951. They were not to include as summer fallow, land ploughed in the summer after a crop, such as hay or fall rye, had been removed. It includes an area which was sown to a crop with the intention of ploughing it under as green manure.

It is evident in some areas that summer fallow includes summer or fall ploughing. Summer fallow in Newfoundland was classified as "other improved land".

(d) **Other Improved Land.**— This item includes the area of barnyards, lanes and roads on farms. It also includes areas of cultivated land that were lying idle, being neither summer fallowed nor cropped, and new breaking that had not yet been cropped.

(e) **Woodland.**— This includes farm woodlots, land leased for cutting and cutover land with young growth which has or will have value as timber or fuelwood. It excludes large timber tracts which are run as a separate business from the farm. There is some evidence that changes in the area of this item between censuses may be due to differences in interpretation. This would be particularly true in areas of brushland.

(f) **Other Unimproved Land.**— Areas of natural pasture or hay land that had not been cultivated, brush pasture, grazing or waste land, sloughs, marsh and rocky land, etc., are all included in this item.

**Farm Values.**— This is the value of farm capital: land, buildings, machinery and equipment (including automobiles) and live stock. Farm operators were asked to give a value for land, buildings, farm machinery and equipment on their farm regardless of tenure. The value reported was to be an estimate of the market value, not the original, replacement or assessed value.

The total value of farm machinery and equipment includes the value of items not reported separately.

Live stock values were compiled from data obtained by the Agriculture Division of the Dominion Bureau of Statistics in a special Sample Survey.

**Crops.**— The 1950 acreages represent the areas harvested whereas the 1951 acreages represent the areas planted or to be planted for harvest that year. While the 1951 data compares with the information taken in previous censuses, the 1950 data differs in that it gives harvested rather than seeded acreages.

"Other field crops" include sunflowers grown for feed and seed production, mustard seed, rape, flax of fibre varieties, hops, etc. Where flax of fibre varieties was grown for seed, the acreage may have been included with "flax seed".

**État de la terre.**— Toute la terre agricole est classée et chaque acre n'est comptée que dans une des catégories. Ces catégories sont les suivantes:

a) **En culture.**— Comprend l'acréage total qui avait été ou devait être mis en culture de quelque sorte en 1951, y compris les jardins potagers. Dans le cas des cultures entre-plantées ou des cultures successives, l'acréage n'est déclaré qu'une fois.

b) **Pâturages améliorés.**— Toute la terre qui a été préparée et ensemencée de graine de pâturage et qui sert de pacage est incluse ici. Les agents recenseurs avaient été avertis de ne pas inclure les prairies naturelles ou la terre à foin devant être pacagée après la coupe du foin.

c) **Jachère.**— Les agents recenseurs devaient indiquer ici l'acréage total labouré ou devant l'être comme jachère en 1951. Ils ne devaient pas compter comme jachère la terre labourée au cours de l'été après qu'une récolte, soit de foin, de seigle d'automne, etc. avait été obtenue. Ils devaient inscrire cependant une superficie ensemencée et retournée ensuite pour que la récolte serve d'engrais vert.

Il est évident que, dans certaines régions, les jachères comprennent les labours d'été ou d'automne. Les jachères à Terre-Neuve ont été classées "autre terre défrichée".

d) **Autre terre défrichée.**— On entend par la superficie occupée par les basses-cours, les routes et les chemins de la ferme. Cette terre comprend aussi les superficies de terre défrichée inemployées, n'étant ni mises en jachère ni en culture, de même que les superficies nouvellement labourées mais non encore mises en culture.

e) **Terres à bois.**— Ces terres comprennent les boisés de ferme, les terres affermées pour la coupe du bois et les terres déboisées et recouvertes d'une jeune pousse qui a ou aura une valeur comme bois d'œuvre ou de chauffage. Elles ne comprennent pas les grandes étendues boisées qui sont exploitées comme entreprises distinctes de la ferme. Il y a lieu de croire que les changements qui se produisent dans la superficie de ces terres d'un recensement à l'autre peuvent être attribués à des différences d'interprétation. Tel serait particulièrement le cas dans les régions de terres en broussaille.

f) **Autre terre non défrichée.**— Sont incluses sous cette rubrique les étendues de terre à pâturage ou foin naturel non cultivé, les pâturages de brousse, les terres à pacage ou incultes, les fondrières, les marais et les terrains rocailleux, etc.

**Valeurs de la ferme.**— Il s'agit ici de la valeur du fonds agricole, de la terre, des bâtiments, de la machinerie et de l'équipement (y compris les automobiles) et du bétail. Les exploitants ont été priés de déclarer la valeur de la terre, des bâtiments, de la machinerie et de l'équipement de leurs fermes, indépendamment du mode d'occupation ou de possession. La valeur déclarée devait être une estimation de la valeur marchande et non de la valeur initiale, de remplacement ou impossible.

La valeur totale de la machinerie et de l'équipement agricoles comprend celle des articles qui ne sont pas déclarés séparément.

La valeur des bestiaux a été calculée d'après les données recueillies lors d'un relevé échantillon spécial effectué par la Division de l'agriculture du Bureau fédéral de la statistique.

**Récoltes.**— Les superficies de 1950 sont les superficies qui ont été récoltées en 1950 tandis que les superficies de 1951 sont celles qui ont été ou seront ensemencées en vue de la récolte de l'année. Rien que les données de 1951 puissent se comparer aux renseignements recueillis lors des recensements antérieurs, celles de 1950 diffèrent en ce qu'elles donnent les superficies récoltées plutôt que les superficies ensemencées.

Les "autres grandes cultures" comprennent le tournesol cultivé comme fourrage et comme semence, la graine de moutarde, le colza, le lin à filasse, le houblon, etc. Là où le lin à filasse est cultivé pour la semence, il se peut que la superficie ait été déclarée sous "graine de lin".

With the exception of Newfoundland, vegetables and small fruits were reported only when grown mainly for sale and tree fruits only when there were 25 or more fruit trees on the farm. Greenhouse and nursery products and mushrooms were reported only when grown mainly for sale.

Enumerators were instructed to include the area of vegetable seed production grown mainly for sale with "other vegetables".

Fruit trees which were definitely abandoned and worthless were not to be included.

The value of field crops was not enumerated in the 1951 Census but was computed from prices supplied by the Agriculture Division of the Bureau of Statistics. These prices were derived from data sent in by price correspondents and represent the average prices received by farmers.

**Live Stock.**— Live stock are related to the farm where located regardless of ownership, except for live stock kept on community pastures. In this case, live stock are related to the farm of the operator owning them rather than to the community pasture.

Bees are related to the farm of the operator owning them rather than to the farm on which they are located. Bees owned by persons other than farm operators are reported as being elsewhere than on farms even though they may have been kept on a farm.

Enumerators were instructed to include as "cows and heifers kept mainly for milk purposes", all animals which were being milked or were to be milked, regardless of breed. However, some of the farms in the sample reported "cows milked yesterday" even though these animals were classified for inventory purposes elsewhere on the schedule as "cows kept mainly for beef purposes". This fact should be kept in mind when considering such derivatives as the average milk production per cow.

**Farm Expenditures.**— Specified farm expenditures for 1950, whether paid in cash or obtained on credit, were reported for each farm in the agriculture sample. In the case of rented farms, these expenditures include all contributions, such as cash, feed, use of machinery, etc., made by the landlord as well as those made by the tenant operator.

**Taxes.**— This item includes real estate taxes levied in 1950 on buildings and land operated by the owner for the year 1950.

**Custom Work.**— Custom work was defined as farming operations in which either equipment or equipment plus labour was hired under contract by the operator of the farm. Activities such as ploughing, new breaking, spraying, threshing, combining, hay baling and trucking were to be classed as custom work provided the equipment was supplied by someone other than the farm operator.

**Hired Farm Labour.**— This item was reported for 1950 under two headings (a) the amount of wages paid in either cash or kind to hired farm labour (except the amount paid for housework and construction labour) (b) the value of house rent or room and board furnished to hired workers.

**Farm Revenues.**— Farm revenues represent the value of sales of all farm products sold from the farm including products traded or exchanged, whether received by the farm operator or some other person. Products of an institutional farm sold by the institution were considered sold.

Crop insurance and Government payments received in 1950 for hail damage, crop failure, etc., were reported as crop sales. Crop participation payments received in 1950 were similarly reported.

Sauf à Terre-Neuve, les légumes et les petits fruits n'ont été déclarés que s'ils avaient été cultivés surtout pour la vente et les fruits d'arbres, que s'il y avait 25 arbres fruitiers ou plus sur la ferme. Les produits de serre et de pépinière, ainsi que les champignons n'ont de même été déclarés que s'ils avaient été cultivés principalement pour la vente.

Les agents recenseurs devaient consigner la superficie de graines et légumes cultivée principalement pour la vente sous "autres légumes".

Les arbres fruitiers abandonnés définitivement et sans valeur n'ont pas été comptés.

Lors du recensement de 1951, la valeur des récoltes de grande culture n'a pas été relevée, elle a été calculée d'après les prix fournis par la Division de l'agriculture du Bureau de la statistique. Ces prix ont été tirés des données fournies par les correspondants sur les prix et représentent les prix moyens reçus par les fermiers.

**Animaux.**— Les animaux sont attribués à la ferme où ils se trouvent, quels qu'en soient les propriétaires, sauf dans le cas des animaux mis dans les pâturages en commun. Dans ce cas, ils sont attribués à la ferme de l'exploitant à qui ils appartiennent plutôt qu'au pâturage en commun.

Les abeilles sont attribuées à la ferme de l'exploitant à qui elles appartiennent plutôt qu'à la ferme où elles se trouvent. Les abeilles qui appartiennent à des personnes autres que les exploitants de fermes sont déclarées comme étant ailleurs que sur les fermes, bien qu'elles puissent être gardées sur celles-ci.

Les agents recenseurs devaient inscrire sous "vaches et génisses gardées principalement pour le lait" tous les animaux traités ou devant l'être, indépendamment de la race. Toutefois, certaines fermes de l'échantillon ont déclaré des "vaches traitées hier", même si, pour fins d'inventaire, elles avaient été classées ailleurs sur le questionnaire comme "vaches gardées principalement pour la boucherie". Il faut tenir compte de ce détail dans l'appréciation de dérivatifs tels que la production moyenne de lait par vache.

**Dépenses de la ferme.**— Chaque ferme de l'échantillon a dû déclarer des dépenses spécifiées pour 1950, qu'elles aient été faites au comptant ou à crédit. Dans le cas des fermes louées, ces dépenses comprenaient toutes les contributions en argent, fourrage, usage de la machinerie, etc. faites par le propriétaire et le locataire.

**Taxes.**— Cet article comprend les taxes foncières prélevées en 1950 sur les bâtiments et la terre exploitée par le propriétaire en 1950.

**Travail à l'entreprise.**— On entend par travail à l'entreprise les travaux agricoles où, en vertu d'un contrat, l'exploitant loue de l'équipement ou de l'équipement et de la main-d'œuvre. Des travaux comme les labours, les premiers labourages, la vaporisation, le battage, le moissonnage-battage, l'emballage, le foisonnement et le camionnage ont été classés comme travail à l'entreprise lorsque l'équipement avait été fourni par quelque autre personne que l'exploitant de la ferme.

**Main-d'œuvre agricole engagée.**— Ce détail a été consigné pour 1950 sous deux rubriques (a) le montant des salaires payés en argent ou en nature à la main-d'œuvre engagée (sauf pour le travail ménager rémunéré et la main-d'œuvre de construction) et (b) la valeur locative de la maison ou de la chambre et de la pension fournies aux ouvriers engagés.

**Revenus de la ferme.**— Les revenus de la ferme comprennent la valeur de tous les produits agricoles vendus à la ferme, y compris les produits échangés, reçue par l'exploitant ou quelque autre personne. Les produits d'une ferme d'institution et consommés par celle-ci, furent considérés comme ayant été vendus.

Les indemnités d'assurance-récolte et les versements du gouvernement reçus en 1950 pour dommages dus à la grêle, à une récolte déficitaire, etc. ont été consignés comme ventes de récoltes. Les paiements de participation reçus en 1950 à l'égard des récoltes ont été consignés de la même façon.

**Economic Classification of Farms.**— This classification takes into account (1) the total value of farm products sold; (2) the number of days the farm operator worked off the farm at either farm or non-farm work; and (3) the relationship of the value of farm products sold to income received by the operator from all other sources, reported for the calendar year 1950.

All farms (except "Institutional farms, etc.") with a total value of farm products sold of \$1,200 or more are classified as "Commercial farms". Farms reporting sales of farm products of between \$250 and \$1,199 are also included in this group if the farm operator (1) worked off the farm less than 100 days and (2) reported the value of farm sales greater than income received from other sources.

"Part-time farms" include those with sales of farm products between \$250 and \$1,199 and (1) the operator reported that he worked 100 days or more off the farm in 1950; or (2) the operator reported the farm income less than his income from other sources.

If the value of farm products sold was less than \$250 the farm is classified as a "small scale farm".

Experimental farms, community pastures, Indian reserves and farms operated by institutions are classified as "Institutional farms, etc.".

**Irrigation.**— Irrigation was defined as water applied to land by artificial means, through a system of ditches, furrows, sprinklers or similar works.

The area irrigated in 1950 was enumerated for all provinces except Newfoundland while additional data was obtained through a special irrigation schedule (Form 8) for Saskatchewan, Alberta and British Columbia.

**Conversion of "Arpents" to "Acres".**— In certain sections of the Province of Quebec, the land measure is the "arpent" and enumerators reported land areas in this unit. The conversion to acres was made in the Dominion Bureau of Statistics using the factor "1,000 arpents equal 845 acres".

**Coverage.**— There were a number of farms (estimated at 200) in the Fort Vermilion Area of Alberta and the Northwest Territories, for which agriculture data were not obtained. Persons living on these farms, however, were included in the population totals of other volumes.

**Classement économique des fermes.**— Dans ce classement, il est tenu compte 1° de la valeur totale des produits agricoles vendus; 2° du nombre de jours que l'exploitant de la ferme a consacrés en dehors de la ferme à du travail agricole ou non agricole; et 3° le rapport entre la valeur des produits vendus et le revenu de l'exploitant provenant de toutes autres sources déclaré pour l'année civile 1950.

Toutes les fermes (sauf les fermes d'institutions) qui avaient vendu pour \$1,200 ou plus de produits agricoles ont été classées "fermes commerciales". Les fermes qui en avait vendu pour une valeur de \$250 à \$1,199 ont aussi été classées de la même façon lorsque 1° l'exploitant avait travaillé hors de la ferme moins de 100 jours et 2° avait déclaré une valeur de vente plus élevée que le revenu touché d'autres sources.

Les "fermes à temps partiel" comprennent les fermes qui ont vendu des produits agricoles pour une valeur de \$250 à \$1,199 et dont l'exploitant 1° a déclaré avoir travaillé 100 jours ou plus hors de la ferme en 1950; ou 2° a déclaré un revenu agricole moindre que son revenu d'autres sources.

Lorsque la valeur des produits agricoles vendus était de moins de \$250, la ferme était classée "petite exploitation agricole".

Les fermes expérimentales, les pâturages en commun, les réserves indiennes et les fermes exploitées par des institutions ont été classées "fermes d'institutions", etc.

**Irrigation.**— On définit l'irrigation comme étant l'eau amenée sur la terre par des moyens artificiels, au moyen de fossés et rigoles, par aspersion et autres ouvrages ou dispositifs de même nature.

Les superficies irriguées en 1950 ont été relevées dans toutes les provinces sauf Terre-Neuve; des renseignements supplémentaires ont été obtenus au moyen d'un questionnaire spécial sur l'irrigation (formulaire 8) en Saskatchewan, en Alberta et en Colombie-Britannique.

**Conversion des "arpents" en "acres".**— Dans certaines parties de la province de Québec, la mesure agraire est "l'arpent" et les agents recenseurs ont consigné les superficies en arpents. La conversion en acres a été faite au Bureau fédéral de la statistique, qui a employé le facteur de 845 acres pour 1,000 arpents.

**Fermes non enquêtées.**— Il y a un certain nombre de fermes (200 estimativement) dans la région de Fort Vermilion, en Alberta, et dans les Territoires du Nord-Ouest, à l'égard desquelles les données agricoles n'ont pas été obtenues. Toutefois, les personnes habitant ces fermes sont comprises dans les totaux de la population dans les autres volumes.

#### Symbols used:

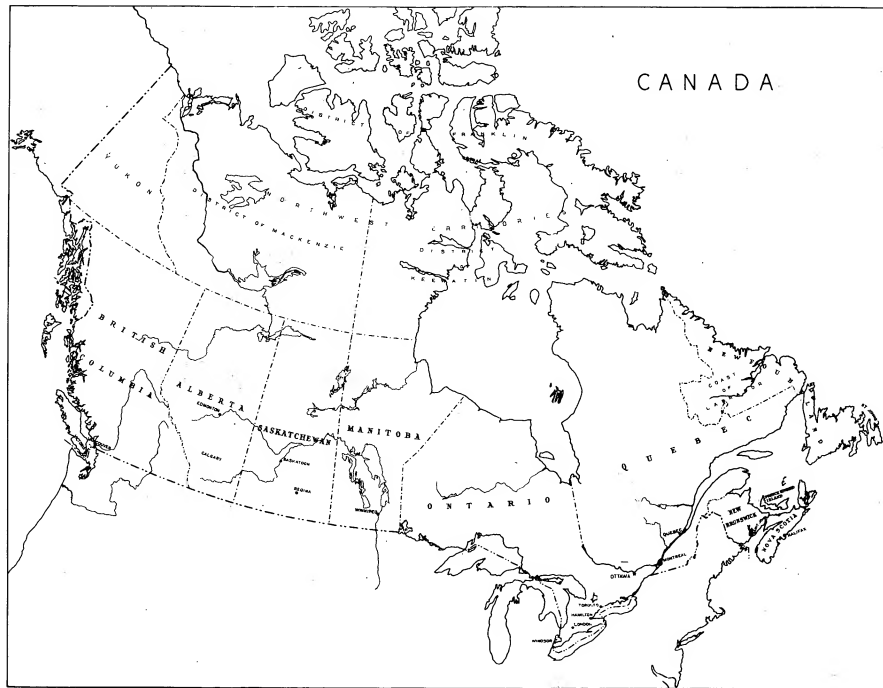

- to indicate nil or zero
- .. to indicate figures are not available
- to indicate (a) less than one acre in acreage tables, or (b) less than 100 in tables showing data based on a 20% sample.

#### Signes conventionnels:

- signifie néant ou zéro
- .. chiffres non disponibles
- a) moins d'une acre dans les tableaux de superficies, ou b) moins de 100 dans les tableaux donnant les chiffres basés sur un échantillon de 20 p. 100

<sup>1</sup> Based on 20% sample, except in Newfoundland. - 1. Includes Newfoundland, Yukon and Northwest Territories. 2. Includes Yukon and Northwest Territories. 3. Includes 485 members of the Royal Canadian Navy whose province of residence is not known. 4. For comparison with later censuses, deductions have been made as follows: 33,615 plots under 1 acre in 1901 and 30,141 in 1911. In 1911 and 1921, farms on Indian Reserves in the Prairie Provinces were not included. 5. "Full ownership" means that the operator holds the title to all the land which he operates. It does not necessarily mean that the farm is free of debt. 6. Land area revised since 1901. 7. Area includes only improved acreage on Indian Reserves in the Prairie Provinces. 8. Includes "operated by a manager". 9. Includes field, garden, orchard and nursery crop land. 10. Includes idle land. 11. Does not include Newfoundland. 12. Includes automobiles. 13. Does not include value of "Other poultry". 14. Mortgages only. 15. Reported on buildings and land operated by the owner. 16. On all land and buildings owned by farm operators, including farm property owned by these operators and rented to someone else. 17. Does not include rent for farms operated by share tenants and by cash and share tenants. 18. Includes estimated value of rent paid in kind and on a share basis.

1. Includes data for Newfoundland, Yukon and Northwest Territories in 1951. - Comprend les données de Terre-Neuve, du Yukon et des Territoires du Nord-Ouest en 1951.

2. The age breakdown of trees, on farms with less than 50 fruit trees, was not obtained in 1941, although the totals for each kind include trees on such farms. - La classification recoupée des arbres par âge sur les fermes ayant moins de 50 arbres fruitiers, n'a pas été obtenue en 1941, mais les totaux pour chaque espèce comprennent les arbres sur ces fermes.

3. For purposes of comparison, apple and pear trees under 10 years of age; peach, plum and cherry trees under 5 years of age were considered "not of bearing age". - Pour fin de comparaison les pommiers et les poiriers de moins de 10 ans; les pêchers, les pruniers et les cerisiers de moins de 5 ans, ont été considérés "trop jeunes pour rapporter".

4. Limited to farms with 25 or more fruit trees. - Limité aux fermes ayant 25 arbres fruitiers ou plus.

5. Includes apricot and prune trees. - Comprend abricotiers et pruniers.

6. Sweet and sour. - Sucrés et aigres.

1. Includes data for Newfoundland, Yukon and Northwest Territories (See Appendix A for Newfoundland table). - Comprend les données de Terre-Neuve, du Yukon et des Territoires du Nord-Ouest (Voir Appendice A pour le tableau de Terre-Neuve).

2. Includes data for 36,514 holdings of from 1 to 3 acres in size, producing less than \$250 worth of products, which would be included as farms in earlier years. - Comprend les données pour 36,514 terres de 1 à 3 acres produisant moins de \$250 de produits, lesquelles seraient incluses comme fermes, dans les années précédentes.

3. Includes \$260,187, the value of 1,935 mules and \$29,803, the value of 3,499 sheep. - Comprend \$260,187, la valeur de 1,935 mulets et \$29,803, la valeur de 3,499 moutons.

4. Includes \$26,145, the value of 368 mules. - Comprend \$26,145, la valeur de 366 mulets.

5. Does not include the value of "Other poultry" for Canada or sheep for Newfoundland. - Ne comprend pas la valeur de "Autres volailles" pour le Canada ou des moutons pour Terre-Neuve.

6. British Columbia only. - Colombie-Britannique seulement.

7. Does not include the value of wool for Newfoundland. - Ne comprend pas la valeur de la laine pour Terre-Neuve.

8. Includes home use. - Comprend la consommation ménagère.

\* Includes data for Yukon and Northwest Territories.

1. 1 year and over.

2. 6 months and over.

3. Includes alfalfa, clovers and all cultivated grasses.

4. Includes sugar beets for sugar.

1. 1 year and over.

2. 6 months and over.

3. Includes alfalfa, clovers and all cultivated grasses.

4. Includes sugar beets for sugar.

1. 1 year and over.

2. 6 months and over.

3. Includes alfalfa, clovers and all cultivated grasses.

4. Includes sugar beets for sugar.

TABLEAU 31. Bétail sur les fermes et superficie des grandes cultures, 1951, par division de recensement — suite

1. 1 year and over.

2. 6 months and over.

3. Includes alfalfa, clovers and all cultivated grasses.

4. Includes sugar beets for sugar.

1. 1 an et plus.

2. 6 mois et plus.

3. Comprend la luzerne, les trèfles et toutes les herbes cultivées.

4. Comprend les betteraves à sucre pour sucre.

1. Includes area operated by manager.

2. Includes field, garden, orchard and nursery crop land.

3. Includes summer fallow.

4. Includes data for 1 farm in Subdivision B — Placentia.

5. See footnote 4.

6. See footnote 7.

7. Includes data for 1 farm in Subdivision B — Placentia Bay N.W.

8. See footnote 9.

9. Includes data for 1 farm in Subdivision B — Harbour Breton.

1. Includes area operated by manager.

2. Includes field, garden, orchard and nursery crop land.

3. Includes summer fallow.

4. Includes data for 1 farm in Subdivision D - Terra Nova.

5. See footnote 4.

6. Includes data for 1 farm in Subdivision J - Trinity.

7. See footnote 6.

8. See footnote 9.

9. Includes data for 1 farm in Subdivision A - White Bay South.

10. Includes data for 1 farm in Subdivision I - Twillingate Island, and 1 farm in Subdivision L - Sir Charles Hamilton Sound.

11. See footnote 10.

12. Includes data for 1 farm in Subdivision F - White Bay North.

13. Includes data for 1 farm in Subdivision E - Hare Bay.

14. See footnote 13.

15. See footnote 12.

1. Includes value of automobiles.

2. Includes value of bees, hens and chickens, turkeys, ducks and geese.

3. Includes data for 1 farm in Subdivision D - Terra Nova.

4. See footnote 3.

5. Includes data for 1 farm in Subdivision J - Trinity.

6. See footnote 5.

7. See footnote 6.

8. Includes data for 1 farm in Subdivision A - White Bay South.

9. Includes data for 1 farm in Subdivision I - Twillingate Island and 1 farm in Subdivision L - Sir Charles Hamilton Sound.

10. See footnote 9.

11. Includes data for 1 farm in Subdivision F - White Bay North.

12. Includes data for 1 farm in Subdivision E - Hare Bay.

13. See footnote 12.

14. See footnote 11.

TABLEAU 30. Valeurs de la ferme, grandeur des fermes et fermes inhabitées, 1951, par subdivision - fin

| All<br>occupied<br>farms<br>—<br>Toutes<br>fermes<br>occupées | Size of farm — Grandeur de la ferme |     |       |        |         |         |         |         |         |           |             |                              | Non-<br>resident<br>farms<br>—<br>Fermes<br>inhabitées | No |  |

1. 1 year and over.

2. 6 months and over.

3. Includes alfalfa, clovers and all cultivated grasses.

4. Includes sugar beets for sugar.

5. Includes data for 1 farm in Subdivision B - Placentia.

6. See footnote 5.

7. No farms.

8. See footnote 9.

9. Includes data for 1 farm in Subdivision B - Placentia Bay N.W.

10. See footnote 11.

11. Includes data for 1 farm in Subdivision B - Harbour Breton.

1. 1 an et plus.

2. 6 mois et plus.

3. Comprend la luzerne, les trèfles et toutes les herbes cultivées.

4. Comprend les betteraves à sucre pour sucre.

5. Comprend les données relatives à 1 ferme dans la subdivision B—Placentia.

6. Voir renvoi 5.

7. Aucune ferme.

8. Voir renvoi 2.

9. Comprend les données relatives à 1 ferme dans la subdivision B—Placentia Bay N.—O.

10. Voir renvoi 11.

11. Comprend les données relatives à 1 ferme dans la subdivision B—Harbour Breton.

TABLE 3L Live stock on farms and area of field crops, 1951, by subdivision - Concluded

1. 1 year and over.

2. 6 months and over.

3. Includes alfalfa, clovers and all cultivated grasses.

4. Includes sugar beets for sugar.

5. No farms.

6. Includes data for 1 farm in Subdivision D - Terra Nova.

7. See footnote 6.

8. Includes data for 1 farm in Subdivision J - Trinity.

9. See footnote 8.

10. See footnote 11.

11. Includes data for 1 farm in Subdivision A - White Bay South.

12. Includes data for 1 farm in Subdivision I - Twillingate Island and 1 farm in Subdivision L - Sir Charles Hamilton Sound.

13. See footnote 12.

14. Includes data for 1 farm in Subdivision F - Hare Bay.

15. Includes data for 1 farm in Subdivision E - Hare Bay.

16. See footnote 15.

17. See footnote 14.

1. 1 an et plus.

2. 6 mois et plus.

3. Comprend la luzerne, les trèfles et toutes les herbes cultivées.

4. Comprend les betteraves à sucre pour sucre.

5. Aucune ferme.

6. Comprend les données relatives à 1 ferme dans la subdivision D - Terra Nova.

7. Voir renvoi 6.

8. Comprend les données relatives à 1 ferme dans la subdivision J - Trinity.

9. Voir renvoi 8.

10. Voir renvoi 11.

11. Comprend les données relatives à 1 ferme dans la subdivision A - White Bay South.

12. Comprend les données relatives à 1 ferme dans la subdivision I - Twillingate Island et 1 ferme dans la subdivision L - Sir Charles Hamilton Sound.

13. Voir renvoi 12.

14. Comprend les données relatives à 1 ferme dans la subdivision F - White Bay North.

15. Comprend les données relatives à 1 ferme dans la subdivision E - Hare Bay.

16. Voir renvoi 15.

17. Voir renvoi 14.

<sup>1</sup> Based on 20% sample. 1. For comparison with the later censuses, deductions have been made as follows: 266 plots under 1 acre in 1901 and 236 in 1911. 2. "Full ownership" means that the operator holds the title to all the land which he operates. It does not necessarily mean that the farm is free of debt. 3. Estimate made in 1931. 4. Includes "operated by a manager". 5. Includes field, garden, orchard and nursery crop land. 6. Includes idle land. 7. Includes automobiles. 8. Does not include value of "Other poultry". 9. Mortgages only. 10. Reported on buildings and land operated by the owner. 11. On all land and buildings owned by farm operators, including farm property owned by these operators and rented to someone else. 12. Does not include rent for farms operated by share tenants and by cash and share tenants. 13. Includes estimated value of rent paid in kind and on a share basis.

† Fondé d'après un échantillon de 20 p.c. 1. Pour comparaison avec les derniers recensements, ont été éliminés: 266 lopins de moins de 1 acre en 1901 et 258 en 1911. 2. "Propriété entière" signifie que l'exploitant possède la terre qu'il exploite, ce qui ne veut pas dire que la ferme est exempte de dette. 3. Estimation faite en 1931. 4. Comprend "exploitée par un gérant". 5. Comprend la terre en grande culture, les jardins, les vergers et les pépinières. 6. Comprend la terre improductive. 7. Comprend les automobiles. 8. Ne comprend pas la valeur de "autres valeurs". 9. Hypothèques seulement. 10. Sur les bâtiments et la terre exploitée par le propriétaire. 11. Sur toute la terre et les bâtiments possédés par les exploitants de ferme, comprenant les biens agricoles possédés par ces exploitants et leur à cuisiner autre. 12. Ne comprend pas le loyer des fermes exploitées par les locataires à part ou les locataires partie à parts et partie en argent. 13. Comprend la valeur estimative du loyer payé en espèces ou sur une base de participation.

| Not of bearing age - Trop jeunes pour rapporter                  | 21,514          | 15,412  | 1,768              | 2,184   | 220                 | 368                 |
| Of bearing age - D'âge à rapporter                               | 48,917          | 37,682  | 8,769              | 6,801   | 233                 | 396                 |

1. The age breakdown of trees, on farms with less than 50 fruit trees, was not obtained in 1941, although the totals for each kind include trees on such farms. - La classification recoupée des arbres par âge sur les fermes ayant moins de 50 arbres fruitiers, n'a pas été obtenue en 1941, mais les totaux pour chaque espèce comprennent les arbres sur ces fermes.

2. For purposes of comparison, apple and pear trees under 10 years of age; peach, plum and cherry trees under 5 years of age were considered "not of bearing age". - Pour fin de comparaison les pommiers et les poiriers de moins de 10 ans; les pêchers, les pruniers et les cerisiers de moins de 5 ans, ont été considérés "trop jeunes pour rapporter".

3. Limited to farms with 25 or more fruit trees. - Limité aux fermes ayant 25 arbres fruitiers ou plus.

4. Includes apricot and prune trees. - Comprend abricotiers et pruniers.

5. Sweet and sour. - Sucrées et aigres.

1. 1 an et plus.

2. 8 mois et plus.

3. Comprend la luzerne, les trèfles et toutes les herbes cultivées.

4. Comprend les betteraves à sucre pour sucre.

5. Aucune ferme.

<sup>1</sup> Based on 20% sample. 1. For comparison with the later censuses, deductions have been made as follows: 1,555 plots under 1 acre in 1901 and 1,143 in 1911. 2. "Full ownership" means that the operator holds the title to all the land which he operates. It does not necessarily mean that the farm is free of debt. 3. Estimate made in 1931. 4. Includes "operated by a manager". 5. Includes field, garden, orchard and nursery crop land. 6. Includes idle land. 7. Includes automobiles. 8. Does not include value of "other poultry". 9. Mortgages only. 10. Reported on all buildings and land operated by the owner. 11. On all land and buildings owned by farm operators, including farm property owned by these operators and rented to someone else. 12. Does not include rent for farms operated by share tenants and by cash and share tenants. 13. Includes estimated value of rent paid in kind and on a share basis.

1. Fondé d'après un échantillon de 20 p.c. 1. Pour comparaison avec les derniers recensements, ont été éliminés: 1,555 lopins de moins de 1 acre en 1901 et 1,143 en 1911. 2. "Propriété entière" signifie que l'exploitant possède la terre sur toute la terre qu'il exploite, ce qui ne veut pas dire que la ferme est exempte de dette. 3. Estimation faite en 1931. 4. Comprend "exploitée par un gérant". 5. Comprend la terre en grande culture, les jardins, les vergers et les pépinières. 6. Comprend la terre improductive. 7. Comprend les automobiles. 8. Ne comprend pas la valeur de "autres valeurs". 9. hypothèques seulement. 10. Sur les bâtiments et la terre exploitée par le propriétaire. 11. Sur toute la terre et les bâtiments possédés par les exploitants de ferme, comprenant les biens agricoles possédés par ces exploitants et loués à quelqu'autre. 12. Ne comprend pas le loyer des fermes exploitées par les locataires à parts ou les locataires partie à parts et partie en argent. 13. Comprend la valeur estimative du loyer payé en espèces ou sur une base de participation.

1. The age breakdown of trees, on farms with less than 50 fruit trees, was not obtained in 1941, although the totals for each kind include trees on such farms. - La classification recoupée des arbres par âge sur les fermes ayant moins de 50 arbres fruitiers, n'a pas été obtenue en 1941 mais les totaux pour chaque espèce comprennent les arbres sur ces fermes.

2. For purposes of comparison, apple and pear trees under 10 years of age; peach, plum and cherry trees under 5 years of age were considered "not of bearing age". - Pour fin de comparaison les pomiers et les poiriers de moins de 10 ans; les pêchers, les pruniers et les cerisiers de moins de 5 ans, ont été considérés "trop jeunes pour rapporter".

3. Limited to farms with 25 or more fruit trees. - Limité aux fermes ayant 25 arbres fruitiers ou plus.

4. Includes apricot and prune trees. - Comprend abricotiers et pruniers.

5. Sweet and sour. - Sucrées et aigres.

TABLE 8. Field crops: Area<sup>1</sup>, production and value, 1900-1950  
TABLEAU 8. Grandes cultures: Superficie<sup>1</sup>, production et valeur, 1900-1950

| Item - Détail                           | Area<br>Superficie | Production   | Value<br>Valeur |
|---|--------------------|--------------|-----------------|
|   | acres              | bu. - boiss. | dollars         |
| Wheat, all - Tout blé .....             | 1900 18,334        | 246,478      | ..              |
| 1910 12,198                             | 223,530            | 229,802      | ..              |
